Complexity Complex

Stealth +10 (trained)

Description The cauldron bubbles over with a frigid mixture, causing an icy mist to coalesce in an aura around.

Disable DC 22 Athletics to tip the cauldron, DC 20 Arcana or Occultism (trained) to ward against the cauldron's effects.

AC 20, **Fort** +12, **Ref** +6, **Will** +6

Hardness 10, **HP** 48 (BT 24); **Immunities** critical hits, object immunities, precision damage

Bubbling Backlash  (cold, occult); **Trigger** A creature other than Radosek is within 15 feet of the cauldron for at least 1 round; **Effect** The cauldron bubbles intensely, causing its contents to burst from the mouth of the cauldron. Each creature within 30 feet of the cauldron must attempt a DC 23 Reflex save, with the following results. Radosek is immune to the cauldron's effects, as he controls the cauldron. The cauldron then rolls initiative.

Critical Success The creature is unaffected.

Success The creature takes 1d4 cold damage.

Failure The creature takes 2d4 cold damage and is slowed 1 for 1 round.

Critical Failure The creature takes 4d4 cold damage and is slowed 1 for 1 minute.

Routine The icy mist begins to settle along the floor. Increase the area of the cauldron's icy aura by 5 feet (the area of the cauldron's icy aura is considered uneven ground and difficult terrain; creatures that start their turn on the ice take 1d8 cold damage [basic Reflex DC 20]).

Reset The cauldron becomes inert (resuming its usual bubbling) at the end of any round in which no creature other than Radosek remains within 15 feet of it.
