

FROZEN CLOCKTOWER

HAZARD 6

COMPLEX MAGICAL MECHANICAL TRAP

Complexity Complex

Stealth +16 (expert) to detect the magical sensor; noticing the tracks has a DC of 0

Description A complex series of mechanical devices is controlled by a magical sensor that detects any creature on this floor of the tower (other than Logrivic).

Disable DC 26 Thievery (expert) to jam the gears to stop them from spinning, DC 22 Thievery (master) to disable the mechanical bellringer, or *dispel magic* (4th rank; counteract DC 22) to counteract the sensor

AC 24, **Fort** +15, **Ref** +13

Hardness 14, **HP** 56 (BT 28); **Immunities** critical hits, object immunities, precision damage

Gear Spin ➤ **Trigger** A creature steps foot on the bellringer tracks; **Effect** The gears begin to spin and the clocktower rolls initiative.

Routine (3 actions) On its initiative, the trap uses its first action to send its bellringer along the track to the icy platform of the tower. The trap uses its second action to ring its bell, causing all creatures (other than Logrivic) within 15 feet of the bellringer to take 2d10 sonic damage (basic Fortitude save DC 24). The trap uses its third action to send its bellringer along the track to the back of the tower to rest. Creatures on the track when the bellringer passes take 2d10 bludgeoning damage (basic Reflex DC 24).

Reset The trap deactivates and resets if 1 minute passes without any creature (other than Logrivic) on this floor of the tower.
